Physical Pin, Lifecycle Flows, and Workforce Profile

Mapping Cross-Border Supply Chains and Regional Infrastructure

Arika Khor
University of Oklahoma | Fall 2026

The Core Stake (Why Care): Clean digital interfaces and automated AI filters are subsidized by low-wage workers reviewing graphic queues under 15-second quotas, only to be laid off once their annotations train automated models.

1. Frontline Delivery Floor

Physical Operations

- **Site:** Regional Data Delivery Center, Bangsar South, Kuala Lumpur (`3.1114° N, 101.6669° E`).
- **Operation:** Frontline facility operating 24/7 rotating shifts processing uncurated multimedia content.
- **Workforce:** Multilingual young professionals earning $600 to $900 USD/month under automated quota surveillance.
- **Externalities:** High turnover, cognitive fatigue, and acute occupational trauma.

2. Corporate Capital & Headquarters

Financial & Policy Node

- **Platform:** Global parent company headquartered at One Raffles Quay, Singapore (`1.2818° N, 103.8526° E`).
- **Vendor:** Third-party BPO service provider handling facility management and absorbing employer liability.
- **Arbitrage:** Capital and intellectual property stay anchored in high-income hubs; labor costs and psychological trauma are externalized across borders.

Corporate HQ (Policy & Venture Capital) → **BPO Vendor** (Floor Management) → **Delivery Center** (Human Annotation & RLHF) → **Automated Models** (Production Deployment)

Governance, Empirical Metrics, and Supply Chain Opacity

Labor Regulation, Automation Paradox, and Corporate Secrecy

Arika Khor
University of Oklahoma | Fall 2026

500+ Workers
Terminated in Single Wave
October 2024 Restructuring Wave

The Automation Substitution Paradox:
Eliminated over 500 content moderation positions as operations shifted to automated AI safety models. Over 80% of violating content is now removed automatically by models trained on these workers' prior annotations. Human workers trained the systems that replaced them.

Governing Laws and Regulatory Gaps

Statutory Scope

- **Labor:** Governed under standard employment acts regulating contracts, working hours, and severance notice.
- **Content:** Governed under multimedia and communications statutes penalizing online transmission of offensive content.
- **Gaps:** Physical safety is mandated, but digital cognitive harm, pacing quotas, and vicarious trauma remain unregulated.
- **Liability:** Vendor subcontracts legally insulate platform parents from direct employer liabilities.

Supply Chain Opacity and Missing Data

Systemic Concealment

- **NDAs:** Strict confidentiality agreements prohibit contractors from disclosing clients, guidelines, or quotas.
- **Arbitrage:** Financial secrecy conceals the wide profit spread between parent billing rates and vendor wages.
- **Telemetry:** Long-term psychiatric outcomes and employee mental health metrics are omitted from public CSR disclosures.
- **Representation:** Frontline workers possess zero collective bargaining representation.

Generative AI Comparative Audit & Academic References

Auditing Commercial LLMs Against Empirical Evidence and Graduate Literature

AUDIT STACK ARCHITECTURE: Multi-agent audit pipeline combining Gemini high-reasoning runner, Hermes/Jev deterministic defense gates, and an autonomous ClearSet research swarm verifying SEC filings and official government databases.

1. What It Got Right

- **Outsourcing:** Correctly identified outsourced labor delivery centers in Southeast Asia.
- **Headquarters:** Accurately cited regional management and financial hubs.

2. What It Hallucinated

- **PR:** Parroted corporate claims of competitive tech salaries and comprehensive psychological wellness care.
- **Quotas:** Erased brutal daily review quotas and sub-15-second review pacing.

3. What It Missed

- **Layoffs:** Completely missed the October 2024 mass layoff of 500+ workers replaced by AI.
- **Extraction:** Failed to analyze the cross-border capital extraction pipeline.
